

# Grading the Public Schools

*On June 1, a searchable version of our "Grading the Public Schools" chart will be available on our Web site, [www.honolulumagazine.com](http://www.honolulumagazine.com).*

¶ It's report card time again. For the third year, we've compiled official DOE data on 259 public schools statewide and used it to grade and rank our schools. How are students faring on the state's standardized tests? Are these children, their parents and their teachers satisfied with their schools? You'll find out here.

By Ronna Bolante

## ❑ Grading the Public Schools: The Report Card

From here to page 68, you'll find our ranking of 259 public schools. Plus, find out which ones have improved and which have declined since 2004, the last time we published the chart. Before you skip ahead, check out our Quick Guide on how to read the chart, below.

## ❑ Our Schools: Has Anything Changed?

In May 2001, we published "The Death of Public School," examining the multitude of problems with our government-run school system. Are our schools any better today than they were five years ago? *Find out on page 70.*

**RANK** This list ranks the government-run public schools by overall score, from 1 to 259. **RANK IN 2004** Refers to the "Grading the Public Schools" list in our May 2004 issue, the last time we published the chart. **DISTRICT** The statewide school system is divided into seven administrative districts, including O'ahu's *HONOLULU*, *CENTRAL*, *LEEWARD* and *WINWARD* districts; the Big Island's *HAWAII* district; Maui, Moloka'i and Lana'i's *MAUI* district and the *KAUAI* district. **TEACHERS** Percentage of teachers responding to the DOE's 2005 *School Quality Survey* who strongly agree or agree with the statement "I would send my own child to this school." **PARENTS** Percentage of parents responding to the DOE's 2005 *School Quality Survey* who strongly agree or agree with the statement "I would recommend my child's school to other parents." **STUDENTS** Percentage of students responding to the DOE's 2005

*School Quality Survey* who disagree or strongly disagree with the statement "If I could, I would go to a different public school."

**MATH** Percentage of students whose proficiency meets or exceeds Hawai'i Content and Performance Standards (HCPS III) in Math, the state DOE's base line for determining whether schools meet academic benchmarks under the federal No Child Left Behind Act. **READING** Percentage of students whose proficiency meets or exceeds Hawai'i Content and Performance Standards (HCPS III) in Reading, the state DOE's base line for determining whether schools meet academic benchmarks under the federal No Child Left Behind Act. **SCORE** Average of the five measures of satisfaction and student performance. **LETTER GRADE** Once we ranked the schools by overall score, we assigned a letter grade to each, grading on a curve.

**RED LISTINGS:** indicates schools identified as "failing," according to standards set by the state DOE under the federal No Child Left Behind Act of 2001. In our previous two charts, only high-poverty, or Title I, schools receiving federal assistance were sanctioned for failing to meet these standards. As of 2004, all of Hawai'i's 285 public schools must now meet local benchmarks under NCLB. **(CONVERSION):** indicates the four traditional DOE schools that have converted to semiautonomous charter schools over the past six years. We have excluded Hawai'i's 23 New Century, or startup, charter schools from the list, because most of them did not administer the DOE's *School Quality Survey* to its teachers, parents and students and several did not disclose test scores, giving us an incomplete picture of their overall performance.
